

NaF3000 Series of products

Features of NaF3000 Series

- NaF3000 series are ceramic-filled PTFE high-frequency copper clad laminates (CCLs) independently developed and produced by NaF-T.
- The dielectric constant is very stable and the dielectric loss is ultra low (D_k : 3.0~10.2; D_f : 0.00098~0.0023).

▶ Consistent and stable

▶ High peel strength

▶ Low dielectric loss

▶ Excellent cost performance

Application Fields of NaF3000 Series

- The Products are used in antenna, millimeter wave, military radar, military electronics, missile antenna, etc.
- NaF-T not only produces high-frequency copper clad laminates (CCLs) with ultra low loss, but also can customize the thickness and thermal conductivity of CCLs according to customer's needs.

▶ Space wideband antenna

▶ Missile antenna

▶ Microstrip and strip-line circuits

▶ Base station antenna

▶ Millimeter wave equipment

▶ Phase shifter

▶ Military radar

▶ High-frequency power divider

▶ Phased array radar
